Vanagaram to Ambattur Main Road, Ayanambakkam, Chennai – 600 095

INVITE : National Level Seminar....

Apollo College of Nursing a unit of Apollo hospitals delivers world class education with the state of art infrastructure and has achieved worldwide recognition for quality nursing education.

Since its inception conferences are held to update the knowledge and skills of the faculty and students.

Apollo Hospitals, India's first ISO, JCI and NABH certified healthcare provider with exceptional Clinical success rates and superior technology aims at providing quality health care. To promote a culture of innovation, healthcare leaders must exhibit foster, promote, and reward five key characteristics: divergent thinking, risk taking, failure tolerance, agility/ flexibility and autonomy/freedom.

This seminar will explore innovative opportunities for nurses to develop insight and serve as a primary channel of knowledge sharing and the promotion of innovation within their respective areas of innovation.

"Nursing Now", a three-year global campaign (2018-2020) aims to improve health by raising the profile and status of nursing worldwide. To run in collaboration with the World Health Organization and the International Council of Nurses, "Nursing Now" seeks to empower nurses to take their place at the heart of tackling 21st Century health challenges and maximizes their contribution for achieving Universal Health Coverage

Sustainable Development Goals (SDGs): SDG 3 includes a target to "achieve universal health coverage (UHC), including financial risk protection, access to quality essential health care services, access to safe, effective, quality and affordable essential medicines and vaccines for all.

Universal health coverage (UHC) is about ensuring that people have access to the health care they need without suffering financial hardship

The Apollo Proton Cancer Centre is the first of its kind center in South East Asia. Proton therapy is considered one of the most advanced forms of radiation therapy in the world. This can be attributed to the high levels of precision that the procedure offers, as compared to other treatment options. Proton therapy uses high-energy proton beam for cancer treatment. Proton therapy has ushered in a new paradigm of clinical excellence and outcomes in cancer treatment. It provides targeted treatment and precision unlike any other radiation treatment. Eminent, national speakers share their knowledge and highlights during this conference.

This seminar will be a platform to incorporate the expertise in learning as the first step towards building a culture of sustainable innovation
